Immunology and Cell Biology (1998) **76**, 571–574

Subject Index

Abstracts
  Annual Scientific Meeting of the Transplantation Society of Australia and New Zealand A1
Actinobacillus pleuropneumoniae; and skin immunization 245
adjuvant
  functional aspects of iscoms (Review Article) 295
  macrophage activating factor derived from vitamin D_3-binding protein 237
  mucosal, cholera toxin A1 subunit 280
  natural, recombinant ovine IL-1β and TNF-α 167
  the role of, in infant vaccines 222
ageing; and anti-antiself antibody 27
allelic family; polymorphism in 135
anaesthetics; signal transmission in ligand-gated receptors 436
anergy; oral tolerance as therapy for EAE and MS 74
antibody
  against peripheral myelin glycolipds in people with HIV 535
  anti-antiself, in alloimmune and old mice 27
  interleukin-6 enhances production of in gut (Brief Communication) 560
anti-NK1.1; triggers subpopulation of NK cells 143
apoptosis
  and the Bcl-2 family (Review Article) 1
  and the caspases (Review Article) 1
  Mycoplasma infection sensitizes host cells to 526
  review of recent work (Review Article) 1
  role of Ras and Rho proteins (Review Article) 125
autoimmune encephalomyelitis *see also* experimental autoimmune encephalomyelitis
  specific antigen as therapy for autoimmune disease 91
autoimmunity
  aetiology and pathogenesis of multiple sclerosis 47
  carbohydrate-based inhibitors of inflammation 104
  current immunotherapy for multiple sclerosis 55
  cytokine-directed therapies in MS and EAE 65
  effects of vaccination with T cell receptor peptides 83
  specific antigen as therapy for autoimmune disease 91

B cell
  regulation by CD95 387
  tolerance (Theoretical Article) 369
B lymphocyte
  key mutations in the germinal centre reaction (Theoretical Article) 373
  mitogenic response of, to lipopolysaccharide 332
  T–B collaboration and the immune system 448
baculovirus; expression of porcine granulocyte/macrophage colony stimulating factor 195
basement membrane
  carbohydrate-based inhibitors of inflammation 104
  inhibitors of degradation of 104
BCG
  enhanced nitric oxide production in bovine macrophages infected by 363
  infection in IL-4, IL-5 and IL-10 deficient mice 41
behaviour, sheep; relation to eosinophils and parasite resistance 153
BEN *see* benzoylmesaconine
benzoylmesaconine
  antiviral mechanisms of 209
  regulates burn-associated infection 202
Book Reviews 114, 193, 382, 566
breast cancer; lymphoid cell infiltration of 550

Candida albicans; benzoylmesaconine regulates burn-associated infection 202
carcinoma, renal cell; expression of cytokines in 357
c-Cbl; regulation of T cell receptor-mediated signalling 473
CD95; regulates B cell expansion and elimination 387
cell
  cycle, control of chromosomal DNA replication 467
  proliferation, role of Ras and Rho proteins (Review Article) 125
central nervous system; treatment for inflammation of 104
chaparonin 10; early pregnancy factor is an extracellular homologue of (Review Article) 483
cisplatin; role of in activation of macrophages 513
communication, intercellular; in the immune system 448
concanavalin A; and hepatitis 542
CTLL-2; use in IL-2 bioassay (Brief Communication) 191
current, post-synaptic; regulation of quanta 431
cytokine
  expression in renal cell carcinoma 357
  inflammatory, kinetics of in pulmonary clearance of NTHi (Brief Communication) 556
  intercellular communication in the immune system 448
  overview of (Review Article) 300
  the role of HMGI(Y) in gene transcription 461
cytotoxicity; LFA-1-dependent tumoricidal activity of macrophages 343

demyelination; myelin glycolipids and HIV 535
development
  cortical, regulation of neural stem cell differentiation in the forebrain 414
development
  tropomyosin and neuron morphogenesis 424
diazepam; signal transmission in ligand-gated receptors 436
differentiation
  glia, regulation of in the forebrain 414
  neuron, regulation of in the forebrain 414
DNA
  genomic, heterogeneity in *Leishmania* hsp70 genes (Brief Communication) 186
  replication, cell cycle control of 467
drug resistance; changes in immune recognition and failure to express Fas (CD95) due to 350

EAE *see* experimental autoimmune encephalomyelitis
early pregnancy factor; an extracellular chaparonin 10 homologue (Review Article) 483
endonuclease; Mycoplasma infection and sensitization to apoptosis 526
endosome; signalling pathways, an overview (Meeting Report) 318
eosinophil
  $CD4^+$, regulation of trafficking of, to the lung 454

sheep, relation to behaviour and parasite resistance 153
eotaxin; regulation of eosinophil trafficking to the lung 454
EPF *see* early pregnancy factor
experimental autoimmune encephalomyelitis *see also* autoimmune encephalomyelitis
aetiology and pathogenesis of multiple sclerosis 47
carbohydrate-based inhibitors of inflammation 104
cytokine-directed therapies in 65
effects of vaccination with T cell receptor peptides 83
modification of during pregnancy by EPF (Review Article) 483
oral tolerance as therapy for 74

Fas (CD95); failure to express, due to drug resistance 350
FGF *see* fibroblast growth factor
fibroblast growth factor, receptor; signalling in PC12 cells 406

GABA; signal transmission in ligand-gated receptors 436
galactocerebroside; myelin glycolipids and HIV 535
ganglioside; myelin glycolipids and HIV 535
gene conversion; and somatic mutation in immunoglobulin variable genes (Theoretical Article) 288
gene, variable; recombination in 179
germinal centre; key mutations in (Theoretical Article) 373
germline; recombination in variable genes 179
glatiramer acetate; immunotherapy for multiple sclerosis 55
granulocyte/macrophage colony stimulating factor; porcine, expression of 195
granulocyte; cell–cell signalling systems and blood cell regulation 441
growth factor
early pregnancy factor functions as a (Review Article) 483
regulation of neural stem cell differentiation by 414
gut; interleukin-6 enhances antibody production in gut (Brief Communication) 560

Haemophilus influenzae, non-typeable
characteristics of the immunological response in the pulmonary clearance of 323
inflammatory cytokines in pulmonary clearance of (Brief Communication) 556
haemopoiesis; cell–cell signalling systems 441
heat shock protein; early pregnancy factor (Review Article) 483
hepatitis; and concanavalin A 542
herpes simplex virus
antiviral mechanisms of benzoylmesaconine 209
benzoylmesaconine regulates burn-associated infection 202
high mobility group I(Y)
the role of in cytokine gene transcription in T cells 461
HIV
antibodies against peripheral myelin glycolipids 535
HLA class I; expression of after infection with human cytomegalovirus 217
HLA-A; polymorphism in allelic families 135
HMGI(Y) *see* high mobility group I(Y)
hsp70; heterogeneity in *Leishmania* genes (Brief Communication) 186
human cytomegalovirus; expression of HLA class I and ICAM-2 after infection with 217
Hu-PBL-SCID; T cell engraftment in 520

ICAM *see* intercellular adhesion molecule
IgE; regulation of immune response (Burnet Oration) 119
immune
recognition, changes in, due to drug resistance 350
response, characteristics of, in the pulmonary clearance of NTHi 323
immune stimulating complex
and skin immunization 245
as mucosal vaccine vectors 263
immune system
antigen presentation by cisplatin-activated macrophages 513
intercellular communication in the 448
immunity
B cell tolerance (Theoretical Article) 369
mucosal, functional aspects of iscoms (Review Article) 295
neonatal, functional aspects of iscoms (Review Article) 295
skin immunization using hybrid liposome/iscom vaccine 245
immunization
Escherichia coli heat-labile enterotoxin and cholera toxin 270
oral and nasal, starch microparticles used in 256
skin, using hybrid liposome/iscom vaccine 245
immunoglobulin variable genes
minimization of polymerase chain reaction artefacts 395
somatic mutation and gene conversion in (Theoretical Article) 288
immunohistochemistry; lymphoid cell infiltration of breast cancer 550
immunotherapy
overview of the cytokine network (Review Article) 300
using cytotoxic T lymphcytes (Review Article) 20
infant; the role of adjuvants in vaccines used in 222
injury, thermal
antiviral mechanisms of benzoylmesaconine 209
benzoylmesaconine regulates burn-associated infection 202
intercellular adhesion molecule-2; expression of after infection with human cytomegalovirus 217
interferon; overview of the cytokine network (Review Article) 300
interferon-β
cytokine-directed therapies in MS and EAE 65
immunotherapy for multiple sclerosis 55
interferon-γ
hepatitis and concanavalin A 542
infectious Th1 unresponsiveness 173
inflammatory cytokines in pulmonary clearance of NTHi (Brief Communication) 556
interleukin; overview of the cytokine network (Review Article) 300
interleukin-10; *M. bovis* and BCG infection in mice 41
interleukin-1β; recombinant ovine, as natural adjuvant 167
interleukin-2; use of CTLL-2 in reliable IL-2 bioassay (Brief Communication) 191
interleukin-4
effect of deletion of in cardiac allograft survival (Brief Communication) 563

M. bovis and BCG infection in mice 41
regulation of eosinophil trafficking to the lung 454
interleukin-5
M. bovis and BCG infection in mice 41
regulation of eosinophil trafficking to the lung 454
interleukin-6
enhances antibody production in gut (Brief Communication) 560
hepatitis and concanavalin A 542
iscoms *see* immune stimulating complexes
iscoms; functional aspects of (Review Article) 295

kinase; signalling pathways, an overview (Meeting Report) 318

Leishmania mexicana; sex-determined resistance 159
Leishmania; heterogeneity in hsp70 genes (Brief Communication) 186
leucocyte function associated antigen-1; tumoricidal activity of macrophages 343
leukaemia inhibitory factor; regulation of neural stem cell differentiation by 414
LFA *see* leucocyte function associated antigen
LIF *see* leukaemia inhibitory factor 414
lipopolysaccharide; mitogenic response of B lymphocytes to 332
lung
characteristics of the clearance of NTHi from the 323
inflammatory cytokines in pulmonary clearance of NTHi (Brief Communication) 556
regulation of eosinophil trafficking to the 454
lymphoid cell; infiltration of breast cancer 550

macrophage activating factor; derived from vitamin D_3-binding protein, as adjuvant 237
macrophage
bovine, enhanced nitric oxide production in those infected with *M. bovis* and BCG 363
cisplatin-activated, antigen presentation by 513
cisplatin-treated, LFA-1-dependent tumoricidal activity of 343
membrane domain; signalling pathways, an overview (Meeting Report) 318
MHC; polymorphism in HLA-A allelic families 135
MHC class I; tumour surveillance (Review Article) 20
MHC class II
drug resistance changes immune recognition 350
restricted, derivation of TCR transgenic mice 34
microenvironment; contributions of, to B cell tolerance (Theoretical Article) 369
microparticles, starch; use in oral and nasal immunization 256
mitogen; response of B lymphocytes to lipopolysaccharide 332
model, experimental; pathogenic mechanisms of acute anterior uveitis (Review Article) 497
motor neuron disease; retrograde axonal transport of neurotrophins and implications for 419
multiple sclerosis
aetiology and pathogenesis of 47
carbohydrate-based inhibitors of inflammation 104
current immunotherapy 55
cytokine-directed therapies in 65
effects of vaccination with T cell receptor peptides 83
modification of during pregnancy by EPF (Review Article) 483
oral tolerance as therapy for 74
specific antigen as therapy for autoimmune disease 91
mutation, somatic; and gene conversion in immunoglobulin variable genes (Theoretical Article) 288
Mycobacterium bovis
enhanced nitric oxide production in bovine macrophages infected by 363
infection in IL-4, IL-5 and IL-10 deficient mice 41
Mycoplasma; infection by and sensitization to apoptosis 526
myelin; aetiology and pathogenesis of multiple sclerosis 47
myelin basic protein; effects of vaccination with T cell receptor peptides 83

nerve growth factor; retrograde axonal transport of neurotrophins 419
neuron; morphogenesis and tropomyosin isoform diversity 424
neurotrophin; retrograde axonal transport of 419
NGF *see* nerve growth factor
nitric oxide; production of, enhanced by lymphocytes in bovine macrophages infected by *M. bovis* and BCG 363
NK cells; subpopulation of, triggered by anti-NK1.1 143
NKR-P1; anti-NK1.1 triggers subpopulation of NK cells 143
NTHi *see* non-typeable *Haemophilus influenzae*

parasite; sheep eosinophils, behaviour and resistance to 153
pathogenesis; of acute anterior uveitis (Review Article) 497
pathway, signalling; overview of (Meeting Report) 318
PC12 cell; fibroblast growth factor signalling in 406
PCR *see* polymerase chain reaction
plasma membrane; signalling pathways, an overview (Meeting Report) 318
polymerase chain reaction; minimization of recombination artefacts 395
pregnancy; EPF as an extracellular homologue of chaparonin 10 (Review Article) 483
programming, developmental; contributions of, to B cell tolerance (Theoretical Article) 369

quanta; regulation of synaptic transmission 431

Ras; role of in proliferation and apoptosis (Review Article) 125
rat model, syngeneic; lymphoid cell infiltration of breast cancer 550
receptor
chimeric, effects on fibroblast growth factor signalling in PC12 cells 406
endogenous, effects on fibroblast growth factor signalling in PC12 cells 406
signalling pathways, an overview (Meeting Report) 318
recombination
minimization of polymerase chain reaction artefacts 395
of germline immunoglobulin variable genes 179
regulator, haemopoietic; cell–cell signalling systems 441
respiratory disease, allergic; regulation of immune response (Burnet Oration) 119
Rho; role of in proliferation and apoptosis (Review Article) 125

S phase; cell cycle control of DNA replication 467

sex hormone; and resistance to *L. mexicana* infection 159
signal transduction; of fibroblast growth factor in PC12 cells 406
starch; use in microparticles for oral and nasal immunization 256
statistics; predicted and inferred waiting times for key mutations in the germinal centre reaction (Theoretical Article) 373
synapse
  regulation of quantal transmission size 431
  signal tranmission in ligand-gated receptors 436

T cell
  Cbl in 473
  cytokine gene transcription in 461
  effects of vaccination with T cell receptor peptides 83
  engraftment in hu-PBL-SCID mice 520
  oral tolerance as therapy for EAE and MS 74
  regulation of immune response (Burnet Oration) 119
T cell receptor
  mediation of signalling and regulation by c-Cbl 473
  polymorphism in HLA-A allelic families 135
T lymphocyte
  $CD4^+$, eosinophil trafficking to the lung 454
  cytotoxic, and immunotherapy (Review Article) 20
  helper, reliable IL-2 bioassay for detection of (Brief Communication) 191
  hepatitis and concanavalin A 542
  overview of the cytokine network (Review Article) 300
  T–B collaboration and the immune system 448
TCR; defective expression in transgenic mice 34
Th cell; functional aspects of iscoms (Review Article) 295
Th1 cell
  and response to *L. mexicana* infection 159
  antiviral mechanisms of benzoylmesaconine 209
  infectious unresponsiveness 173
  role of adjuvants in infant vaccines 222
Th2 cell
  antiviral mechanisms of benzoylmesaconine 209
  role of adjuvants in infant vaccines 222
tissue, lymphoid; T cell engraftment in Hu-PBL-SCID mice 520
tolerance, oral; as therapy for EAE and MS 74
toxin
  E. coli heat-labile enterotoxin, immunogenicity and adjuvanticity of 270
  cholera, immunogenicity and adjuvanticity of 270
  cholera, the CTA1-DD adjuvant 280
transcription
  the role of HMGI(Y) in 461
  synaptic, in ligand-gated receptors 436
transmission, synaptic; regulation of quantal size 431
transplantation, heart; effect of deletion of IL-4 in survival of (Brief Communication) 563
transport, retrograde axonal; of neurotrophins, and implications for motor neuron disease 419
tropomyosin; isoform diversity and neuronal morphogenesis 424
tumour; surveillance and MHC molecules (Review Article) 20
tumour necrosis factor; cytokine-directed therapies in MS and EAE 65
tumour necrosis factor-α
  hepatitis and concanavalin A 542
  inflammatory cytokines in pulmonary clearance of NTHi (Brief Communication) 556
  recombinant ovine, as natural adjuvant 167

uveitis
  acute anterior, pathogenic mechanisms in experimental models of (Review Article) 497
  endotoxin-induced, pathogenic mechanisms of (Review Article) 497
  experimental melanin-induced, pathogenic mechanisms of (Review Article) 497

vaccine
  inflammatory cytokines in pulmonary clearance of NTHi (Brief Communication) 556
  mucosal, immune stimulating complexes as vectors for 263
  use of adjuvants in, for infants 222
Vibrio cholerae; immunogenicity and adjuvanticity of 270
vitamin D_3-binding protein; macrophage activating factor derived from, as adjuvant 237
